I. E-Subjective Problems

1) Evaluate: (1983 – 3 *Marks*)
$\int_0^{\pi/4} \frac{\sin(x)+\cos(x)}{9+16\sin(2x)}dx$

2) Find the area bounded by the x-axis, part of the curve $y = (1 + \frac{8}{x^2})$ and the ordinates at x=2 to x=4. If the ordinate at $x = a$ divides the area into two equal parts, (1983 – 3 *Marks*) find a.

3) Evaluate the following (1984 – 2 *Marks*)
$\int_0^{1/2} \frac{xsin^{-1}(x)}{\sqrt{1-x^2}}dx$

4) Find the area of the region bounded by the x-axis and the curves defined by $y = \tan(x), \frac{-\pi}{3} \leq x \leq \frac{\pi}{3};$ (1984 – 4 *Marks*)
$y = \cot(x), \frac{\pi}{6} \leq x \leq \frac{3\pi}{2}$

5) Given a function $f(x)$ such that
(i)it is integrable over every interval on a real line and
(ii) $f(t + x) = f(x)$, for every x and a real t, then show that the integral $\int_a^{a+t} f(x)dx$ is independent of a. (1984 – 4 *Marks*)

6) Evaluate the following: (1985 – 5/2 *Marks*)
$\int_0^{\pi/2} \frac{x\sin(x)\cos(x)}{\cos^4(x)+\sin^4(x)}dx$

7) Sketch the region bounded by the curves $y = \sqrt{5 - x^2}$ and $y = |x - 1|$ and its area. (1985 – 5 *Marks*)

8) Evaluate: $\int_0^{\pi} \frac{xdx}{1+\cos(\alpha)\sin(x)}$,
$0 < \alpha < \pi$ (1986 – 5/2 *Marks*)

9) Find the area bounded by the curves, $x^2 + y^2 = 25,\ 4y = |4 - x^2|$ and x=0 above the x-axis. (1987 – 6 *Marks*)

10) Find the area of the region bounded by the curve C:y=$\tan(x)$, tangent drawn to C at $x = \pi/4$ and the x-axis. (1988 – 5 *Marks*)

11) Evaluate (1988 – 5 *Marks*)
$\int_0^1 \log[\sqrt{1 - x} + \sqrt{1 + x}]dx$

12) If f and g are continuous function on [0,a] satisfying $f(x) = f(a - x)$ and $g(x) + g(a - x) = 2$, then show that $\int_0^a f(x)g(x)dx = \int_0^a f(x)dx$ (1989 – 4 *Marks*)

13) Show that $\int_0^{\pi/2} f(\sin(2x))\sin(x)dx = \sqrt{2}\int_0^{\pi/4} f(\cos(2x))\cos(x)dx$ (1990 – 4 *Marks*)

14) Prove that for any positive integer k, $\frac{\sin(2kx)}{\sin(x)} = 2[\cos(x) + \cos(3x) + \ldots\ldots\ldots\ldots + \cos(2k-1)x]$

Hence prove that (1990 – 4 *Marks*)
$\int_0^{\pi/2} \sin(2kx)\cot(x)dx = \pi/2$

15) Compute the area of the region bounded by the curves $y = ex \ln x$ and $y = \frac{\ln x}{ex}$ where $\ln e = 1$. (1990 – 4 *Marks*)
